## FANUC Robot P-501B

### **Application system**

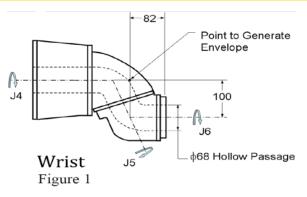

#### **Features**

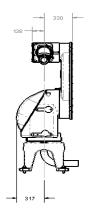

- Floor, wall, angle, and ceiling configurations
- Easily configured left hand or right hand arm to maintain symmetry across the booth
- Designed for ease of maintenance and easy access to all critical components
- High arm and wrist payload design supports a variety of applications including rotary atomizers, conventional and electrostatic spray guns and multi-gun configurations
- Flexible and customizable mounting structures for optimal spray booth integrations
- Ability to package process components in the outer arm in close proximity to the applicator for rapid, accurate, and consistent application performance
- Optional transducers and trigger valve are built into the inner arm for fast process control
- Flip-Over capability provides for a wide variety of work envelopes
- Balanced arm design provides excellent near reach and stroke length
- Two different arm lengths to choose from to optimize process requirements
- 700 Inner & 700 outer arm 15 kg payload-P-50*I*B/15
- 900 Inner & 900 outer arm 10 kg payload-P-501B/10L
- New Mate Controller is compact but with same powerful processor as larger robots
- 140 degree hollow wrist to allow for tight process demands

#### **Software Features**

- LRPaintTOOL software provides the industry's most powerful and easy-to-use programming interface
- Dual Check Safety enables smaller booths and lower system cost
- Collision Guard protects application equipment
- AutoFlowChecker detects fluid delivery system problems in real-time
- Built-in process parameter diagnostic monitoring and reporting provides integrated real-time strip chart capability
- Supports all major network communications protocols
- ROBOGUIDE PaintPro Offline 3D programming
- $oldsymbol{\cdot}$  Supported by the  $oldsymbol{i}$ Pendant Color graphical Teach Pendant
